 - HTML / CSS
- Languages
- Fluent English
 - Native Korean

AWARDS

- Paula Rhodes Award 2024
School of Visual Arts
- Interaction Awards Shortlist 2023
Interaction Design Association

WORK EXPERIENCE

- UX/UI Designer Dec 2024 - Feb 2026
[@ Belinker](#) Seoul, South Korea
- I was responsible for the UX/UI of the Belinker Cloud Service, continuously developing new features and corresponding design updates. Our service helped small and medium-sized manufacturing companies in Korea manage their drawing files in the most optimal way. Since joining, I have communicated with our users to analyze their needs, followed by design planning and UX processes. This process helped me contribute to the establishment and improvement of the overall UI and design system from the early stages of the service. Additionally, I have continuously improved the planning workflow itself for efficient collaboration with front-end and back-end developers.
- Web Design Intern May 2023 - Aug 2023
[@ PNY Technologies](#) New Jersey, United States
- I worked on various pages of the official website of PNY Technologies, including the resource archiving page: A page for helping customers and partners easily access the information they need. By constantly reflecting feedbacks and discussing with my supervisor, I was able to complete several designs that were implemented on the actual website.
- UI Designer Mar 2022 - Apr, 2022
[@ Sir.Loin](#) Seoul, South Korea
- I participated in GUI design as part of the UX team for an in-house app selling Hanwoo beef. I collaborated with the branding team to work on the magazine section and discussed the feasibility of the designs with the development team within the timeline.
- GUI Design Intern Jun 2019 - Aug, 2019
[@ pxd](#) Seoul, South Korea
- I supported the GUI team and contributed to UI/UX design projects for pxd's clients. Through design research, GUI improvements, and icon work for the app's system configuration, I was able to learn the fundamentals and theories of UX/UI.
